THE AMERICAN SOCIETY FOR CELL BIOLOGY

22ND ANNUAL MEETING

Baltimore Convention Center
Baltimore, Maryland
November 30–December 4, 1982

Thoru Pederson
Worcester Foundation for
Experimental Biology
Committee on Scientific Meetings

Abstracts of contributed papers may be submitted or sponsored by members only. The deadline for receipt of abstracts in Bethesda will be *16 July 1982*. Forms and information about the meeting and the Society are available from:

The American Society for Cell Biology
9650 Rockville Pike
Bethesda, Maryland 20814
(301) 530-7153

Dr. Richard S. Young
Executive Officer

Dorothea C. Wilson
Administrative Assistant

Direct inquiries about registration or lodging to:
Professional Associates
2012 Big Bend Boulevard, St. Louis, MO 63117
(314) 781-9192

CONTENTS

VOLUME 93 NUMBER 1 APRIL 1982

Regular Articles

1 **D. W. Barnes.** Epidermal growth factor inhibits growth of A431 human epidermoid carcinoma in serum-free cell culture

5 **M. J. Chrispeels, T. J. V. Higgins, S. Craig, and D. Spencer.** Role of the endoplasmic reticulum in the synthesis of reserve proteins and the kinetics of their transport to protein bodies in developing pea cotyledons

15 **M. Chalfie and J. N. Thomson.** Structural and functional diversity in the neuronal microtubules of *Caenorhabditis elegans*

24 **D. A. Begg, L. I. Rebhun, and H. Hyatt.** Structural organization of actin in the sea urchin egg cortex: microvillar elongation in the absence of actin filament bundle formation

33 **A. S. Bajer.** Functional autonomy of monopolar spindle and evidence for oscillatory movement in mitosis.

49 **P. Stahl and S. Gordon.** Expression of a mannosyl-fucosyl receptor for endocytosis on cultured primary macrophages and their hybrids

57 **M. H. Marnell, M. Stookey, and R. K. Draper.** Monensin blocks the transport of diphtheria toxin to the cell cytoplasm

63 **P. N. T. Unwin and R. A. Milligan.** A large particle associated with the perimeter of the nuclear pore complex

76 **M. Pierce.** Quantification of ganglioside GM_1 synthetase activity on intact chick neural retinal cells

82 **M. Fehlmann, J.-L. Carpentier, A. Le Cam, P. Thamm, D. Saunders, D. Brandenburg, L. Orci, and P. Freychet.** Biochemical and morphological evidence that the insulin receptor is internalized with insulin in hepatocytes

88 **R. A. Bloodgood and G. S. May.** Functional modification of the *Chlamydomonas* flagellar surface

97 **Y. Fujiki, A. L. Hubbard, S. Fowler, and P. B. Lazarow.** Isolation of intracellular membranes by means of sodium carbonate treatment: application to endoplasmic reticulum

103 **Y. Fujiki, S. Fowler, H. Shio, A. L. Hubbard, and P. B. Lazarow.** Polypeptide and phospholipid composition of the membrane of rat liver peroxisomes: comparison with endoplasmic reticulum and mitochrondrial membranes

111 **G. Kreibich, G. Ojakian, E. Rodriguez-Boulan, and D. D. Sabatini.** Recovery of ribophorins and ribosomes in "inverted rough" vesicles derived from rat liver rough microsomes

122 **I. Blikstad and L. Carlsson.** On the dynamics of the microfilament system in HeLa cells

129 **C. Mottola and D. Romeo.** Calcium movement and membrane potential changes in the early phase of neutrophil activation by phorbol myristate acetate: a study with ion-selective electrodes

135 **M. G. Rosenfeld, G. Kreibich, D. Popov, K. Kato, and D. D. Sabatini.** Biosynthesis of lysosomal hydrolases: their synthesis in bound polysomes and the role of co- and post-translational processing in determining their subcellular distribution

144 **L. Marzella, J. Ahlberg, and H. Glaumann.** Isolation of autophagic vacuoles from rat liver: morphological and biochemical characterization

155 **K. A. Fisher.** Monolayer freeze-fracture autoradiography: quantitative analysis of the transmembrane distribution of radioiodinated concanavalin A

164 **K. A. Suprenant and W. L. Dentler.** Association between endocrine pancreatic secretory granules and in-vitro-assembled microtubules is dependent upon microtubule-associated proteins

175 **G. Zampighi, S. A. Simon, J. D. Robertson, T. J. McIntosh, and M. J. Costello.** On the structural organization of isolated bovine lens fiber junctions

190 **M. Hoshina, M. Boothby, and I. Boime.** Cytological localization of chorionic gonadotropin α and placental lactogen mRNAs during development of the human placenta

199 **P. Gupta, J. M. Rosen, P. D'Eustachio, and F. H. Ruddle.** Localization of the casein gene family to a single mouse chromosome

205 **S. S. Brown, K. Yamamoto, and J. A. Spudich.** A 40,000-dalton protein from *Dictyostelium discoideum* affects assembly properties of actin in a Ca^{2+}-dependent manner

Rapid Communications

211 **A. Baron-Van Evercooren, H. K. Kleinman, H. E. J. Seppä, B. Rentier, and M. Dubois-Dalcq.** Fibronectin promotes rat Schwann cell growth and motility

217 **J. B. Rattner, C. Saunders, J. R. Davie, and B. A. Hamkalo.** Ultrastructural organization of yeast chromatin

223 **J. Roth and E. G. Berger.** Immunocytochemical localization of galactosyltransferase in HeLa cells: codistribution with thiamine pyrophosphatase in *trans*-Golgi cisternae

230 **E. J. Patzer, D. M. Schlossman, and J. E. Rothman.** Release of clathrin from coated vesicles dependent upon a nucleoside triphosphate and a cytosol fraction

237 CORRECTION

VOLUME 93 NUMBER 2 MAY 1982

Perspectives

243 **D. S. Friend.** Plasma-membrane diversity in a highly polarized cell

Regular Articles

251 **C. C. Clark, J. Crossland, G. Kaplan, and A. Martinez-Hernandez.** Location and identification of the collagen found in the 14.5-d rat embryo visceral yolk sac

261 **M. Fechheimer and J. J. Cebra.** Phosphorylation of lymphocyte myosin catalyzed in vitro and in intact cells

269 **D. A. Herzlinger, T. G. Easton, and G. K. Ojakian.** The MDCK epithelial cell line expresses a cell surface antigen of the kidney distal tubule

278 **M. T. Kuo.** Analysis of DNA attached to the chromosome scaffold

285 **J. Allan, N. Harborne, D. C. Rau, and H. Gould.** Participation of core histone "tails" in the stabilization of the chromatin solenoid

298 **R. Balhorn.** A model for the structure of chromatin in mammalian sperm

306 **M. J. Chrispeels, T. J. V. Higgins, and D. Spencer.** Assembly of storage protein oligomers in the endoplasmic reticulum and processing of the polypeptides in the protein bodies of developing pea cotyledons

314 **J. Y. Chou, T. Mano, and M. Feldman.** Inhibition of synthesis of α-fetoprotein by glucocorticoids in cultured hepatoma cells

318 **P. J. Nijweide, A. S. van Iperen-van Gent, E. W. M. Kawilarang-de Haas, A. van der Plas, and A. M. Wassenaar.** Bone formation and calcification by isolated osteoblastlike cells

324 **D. J. DeRosier, L. G. Tilney, E. M. Bonder, and P. Frankl.** A change in twist of actin provides the force for the extension of the acrosomal process in *Limulus* sperm: the false-discharge reaction

338 **W. M. Burch and H. E. Lebovitz.** In vitro stimulation of alkaline phosphatase activity in immature embryonic chick pelvic cartilage by adenosine 3′,5′-monophosphate

343 **D. F. Mosher, M. J. Doyle, and E. A. Jaffe.** Synthesis and secretion of thrombospondin by cultured human endothelial cells

349 **N. Morel, R. Manaranche, M. Israël, and T. Gulik-Krzywicki.** Isolation of a presynaptic plasma membrane fraction from *Torpedo* cholinergic synaptosomes: evidence for a specific protein

357 **C. Heltianu, M. Simionescu, and N. Simionescu.** Histamine receptors of the microvascular endothelium revealed *in situ* with a histamine-ferritin conjugate: characteristic high-affinity binding sites in venules

365 **K. Church and H.-P. P. Lin.** Meiosis in *Drosophila melanogaster*. II. The prometaphase-I kinetochore microtubule bundle and kinetochore orientation in males

374 **T. S. Hays, D. Wise, and E. D. Salmon.** Traction force on a kinetochore at metaphase acts as a linear function of kinetochore fiber length

383 **D. K. Drake and S. D. Rosen.** Identification and purification of an endogenous receptor for the lectin pallidin from *Polysphondylium pallidum*

390 **V. Volloch and D. Housman.** Terminal differentiation of murine erythroleukemia cells: physical stabilization of end-stage cells

395 **M. J. Evinger-Hodges, D. Z. Ewton, S. C. Seifert, and J. R. Florini.** Inhibition of myoblast differentiation in vitro by a protein isolated from liver cell medium

402 **J. R. Couchman, D. A. Rees, M. R. Green, and C. G. Smith.** Fibronectin has a dual role in motility and anchorage of primary chick fibroblasts and can promote entry into the division cycle

411 **D. R. Janero and R. Barrnett.** Thylakoid membrane biogenesis in *Chlamydomonas reinhardtii* 137^{+}. II. Cell-cycle variations in the synthesis and assembly of pigment

417 **M. M. Salpeter, S. Spanton, K. Holley, and T. R. Podleski.** Brain extract causes acetylcholine receptor redistribution that mimics some early events at developing neuromuscular junctions

426 **R. S. Wu, D. Nishioka, and W. M. Bonner.** Differential conservation of histone 2A variants between mammals and sea urchins

432 **M. Geetha-Habib and G. B. Bouck.** Synthesis and mobilization of flagellar glycoproteins during regeneration in *Euglena*

442 **J. R. Sanes.** Laminin, fibronectin, and collagen in synaptic and extrasynaptic portions of muscle fiber basement membrane

452 **W. E. Fowler and U. Aebi.** Polymorphism of actin paracrystals induced by polylysine

459 **D. R. Kiino, D. E. Burger, and P. S. Dannies.** Prolactin storage in a clonal strain of rat pituitary tumor cells is cell-cycle dependent

463 **P. Pinto da Silva and M. R. Torrisi.** Freeze-fracture cytochemistry: partition of glycophorin in freeze-fractured human erythrocyte membranes

470 **K. Nagata, J. Sagara, and Y. Ichikawa.** Changes in contractile proteins during differentiation of myeloid leukemia cells. II. Purification and characterization of actin

479 **G. Fayet, S. Hovsépian, J. G. Dickson, and S. Lissitzky.** Reorganization of porcine thyroid cells into functional follicles in a chemically defined, serum- and thyroid stimulating hormone–free medium

Rapid Communications

489 **Y. S. Kanwar and L. J. Rosenzweig.** Clogging of the glomerular basement membrane

495 **B. Geiger, Z. Avnur, and J. Schlessinger.** Restricted mobility of membrane constituents in cell-substrate focal contacts of chicken fibroblasts

501 **D. J. Anderson, P. Walter, and G. Blobel.** Signal recognition protein is required for the integration of acetylcholine receptor δ subunit, a transmembrane glycoprotein, into the endoplasmic reticulum membrane

507 **P. Sherline and R. N. Mascardo.** Epidermal growth factor induces rapid centrosomal separation in HeLa and 3T3 cells

513 CORRECTION

515 ASCB PLACEMENT SERVICE NOTICES

VOLUME 93 NUMBER 3 JUNE 1982

Perspectives

523 **R. G. W. Anderson, M. S. Brown, U. Beisiegel, and J. L. Goldstein.** Surface distribution and recycling of the LDL receptor as visualized with antireceptor antibodies

Regular Articles

533 **J. P. Brunschwig, N. Brandt, A. H. Caswell, and D. S. Lukeman.** Ultrastructural observations of isolated intact and fragmented junctions of skeletal muscle by use of tannic acid mordanting

543 **J. J. S. Cadwell and A. H. Caswell.** Identification of a constituent of the junctional feet linking terminal cisternae to transverse tubules in skeletal muscle

551 **S. P. Banks-Schlegel.** Keratin alterations during embryonic epidermal differentiation: a presage of adult epidermal maturation

560 **B. I. Posner, A. K.Verma, B. A. Patel, and J. J. M. Bergeron.** Effect of colchicine on the uptake of prolactin and insulin into Golgi fractions of rat liver

568 **R. Hammerschlag, G. C. Stone, F. A. Bolen, J. D. Lindsey, and M. H. Ellisman.** Evidence that all newly synthesized proteins destined for fast axonal transport pass through the Golgi apparatus

576 **J. V. Kilmartin, B. Wright, and C. Milstein.** Rat monoclonal antitubulin antibodies derived by using a new nonsecreting rat cell line

583 **A. H. Sarris and G. E. Palade.** Isolation and partial characterization of the sialoglycoprotein fraction of murine erythrocyte ghosts

591 **A. H. Sarris and G. E. Palade.** Immunofluorescent detection of erythrocyte sialoglycoprotein antigens on murine erythroid cells

604 **S. Ogihara and Y. Tonomura.** A novel 36,000-dalton actin-binding protein purified from microfilaments in *Physarum* plasmodia which aggregates actin filaments and blocks actin-myosin interaction

615 **S. P. Remillard and G. B. Witman.** Synthesis, transport, and utilization of specific flagellar proteins during flagellar regeneration in *Chlamydomonas*

632 **C. J. Adams, K. M. Maurey, and B. Storrie.** Exocytosis of pinocytic contents by Chinese hamster ovary cells

638 **H. Tamir, T. C. Theoharides, M. D. Gershon, and P. W. Askenase.** Serotonin storage pools in basophil leukemia and mast cells: characterization of two types of serotonin binding protein and radioautographic analysis of the intracellular distribution of [^{3}H]serotonin

648 **J. D. Pardee and J. A. Spudich.** Mechanism of K^+-induced actin assembly

655 **D. F. Kubai.** Meiosis in *Sciara coprophila*: structure of the spindle and chromosome behavior during the first meiotic division

670 **A. R. Strauch and J. R. LaFountain, Jr.** Centrifugation shearing exposes filamentous networks in cortical regions of crane-fly spermatocytes

680 **K. Tanabe, R. B. Mikkelsen, and D. F. H. Wallach.** Calcium transport of *Plasmodium chabaudi*-infected erythrocytes

685 **R. B. Mikkelsen, K. Tanabe, and D. F. H. Wallach.** Membrane potential of *Plasmodium*-infected erythrocytes

690 **D. L. Bareis, F. Hirata, E. Schiffmann, and J. Axelrod.** Phospholipid metabolism, calcium flux, and the receptor-mediated induction of chemotaxis in rabbit neutrophils

698 **E. Bandman and R. C. Strohman.** Increased K^+ inhibits spontaneous contractions and reduces myosin accumulation in cultured chick myotubes

705 **S. C. Kayman, M. Reichel, and M. Clarke.** Motility mutants of *Dictyostelium discoideum*

712 **G. C. Owens and I. Ohad.** Phosphorylation of *Chlamydomonas reinhardi* chloroplast membrane proteins in vivo and in vitro.

719 **W. H. Fletcher and C. V. Byus.** Direct cytochemical localization of catalytic subunits dissociated from cAMP-dependent protein kinase in Reuber H-35 hepatoma cells. I. Development and validation of fluorescinated inhibitor

727 **C. V. Byus and W. H. Fletcher.** Direct cytochemical localization of catalytic subunits dissociated from cAMP-dependent protein kinase in Reuber H-35 hepatoma cells. II. Temporal and spatial kinetics

735 **E. A. Nothnagel, J. W. Sanger, and W. W. Webb.** Effects of exogenous proteins on cytoplasmic streaming in perfused *Chara* cells

743 **K. E. Kuettner, B. U. Pauli, G. Gall, V. A. Memoli, and R. K. Schenk.** Synthesis of cartilage matrix by mammalian chondrocytes in vitro. I. Isolation, culture characteristics, and morphology

751 **K. E. Kuettner, V. A. Memoli, B. U. Pauli, N. C. Wrobel, E. J.-M. A. Thonar, and J. C. Daniel.** Synthesis of cartilage matrix by mammalian chondrocytes in vitro. II. Maintenance of collagen and proteoglycan phenotype

758 **A. A. Rogalski and G. B. Bouck.** Flagellar surface antigens in *Euglena*: immunological evidence for an external glycoprotein pool and its transfer to the regenerating flagellum

767 **G. J. Gibson, S. L. Schor, and M. E. Grant.** Effects of matrix macromolecules on chondrocyte gene expression: synthesis of a low molecular weight collagen species by cells cultured within collagen gels

775 **I. Cohen, J. M. Gerrard, and J. G. White.** Ultrastructure of clots during isometric contraction

788 **T. C. S. Keller III and L. I. Rebhun.** *Strongylocentrotus purpuratus* spindle tubulin. I. Characteristics of its polymerization and depolymerization in vitro

797 **T. C. S. Keller III, D. K. Jemiolo, W. H. Burgess, and L. I. Rebhun.** *Strongylocentrotus purpuratus* spindle tubulin. II. Characteristics of its sensitivity to Ca^{++} and the effects of calmodulin isolated from bovine brain and *S. purpuratus* eggs

804 **H. R. Byers and K. Fujiwara.** Stress fibers in cells *in situ*: immunofluorescence visualization with antiactin, antimyosin, and anti-alpha-actinin

812 **S. Inoué and L. G. Tilney.** Acrosomal reaction of *Thyone* sperm. I. Changes in the sperm head visualized by high-resolution video microscopy

820 **L. G. Tilney and S. Inoué.** Acrosomal reaction of *Thyone* sperm. II. The kinetics and possible mechanism of acrosomal process elongation

828 **W. D. Cohen, D. Bartelt, R. Jaeger, G. Langford, and I. Nemhauser.** Cytoskeletal system of nucleated erythrocytes. I. Composition and function of major elements

839 **B. Walz.** Ca^{2+}-sequestering smooth endoplasmic reticulum in an invertebrate photoreceptor. I. Intracellular topography as revealed by OsFeCN staining and *in situ* Ca accumulation

849 **B. Walz.** Ca^{2+}-sequestering smooth endoplasmic reticulum in an invertebrate photoreceptor. II. Its properties as revealed by microphotometric measurements

860 **P. H. Fishman.** Internalization and degradation of cholera toxin by cultured cells: relationship to toxin action

866 **M. C. Kielian, R. M. Steinman, and Z. A. Cohn.** Intralysosomal accumulation of polyanions. I. Fusion of pinocytic and phagocytic vacuoles with secondary lysosomes

875 **M. C. Kielian and Z. A. Cohn.** Intralysosomal accumulation of polyanions. II. Polyanion internalization and its influence on lysosomal pH and membrane fluidity

883 **A. O. Jorgensen, A. C.-Y. Chen, P. Daly, and D. H. MacLennan.** Localization of Ca^{2+} + Mg^{2+}-ATPase of the sarcoplasmic reticulum in adult rat papillary muscle

893 **H.-P. Schmid, K. Köhler, and B. Setyono.** Possible involvement of messenger RNA–associated proteins in protein synthesis

899 **N. Mimura and A. Asano.** Characterization and localization of actinogelin, a Ca^{2+}-sensitive actin accessory protein, in nonmuscle cells

910 **A. R. Poole, I. Pidoux, A. Reiner, L. Cöster, and J. R. Hassell.** Mammalian eyes and associated tissues contain molecules that are immunologically related to cartilage proteoglycan and link protein

921 **A. R. Poole, I. Pidoux, A. Reiner, and L. Rosenberg.** An immunoelectron microscope study of the organization of proteoglycan monomer, link protein, and collagen in the matrix of articular cartilage

938 **I. A. Vorobjev and Yu. S. Chentsov.** Centrioles in the cell cycle. I. Epithelial cells

950 **D. E. Koppel, J. M. Oliver, and R. D. Berlin.** Surface functions during mitosis. III. Quantitative analysis of ligand-receptor movement into the cleavage furrow: diffusion vs. flow

961 **R. H. Schinz, M.-V. C. Lo, D. C. Larrivee, and W. L. Pak.** Freeze-fracture study of the *Drosophila* photoreceptor membrane: mutations affecting membrane particle density

970 **E. Weidner and W. Byrd.** The microsporidian spore invasion tube. II. Role of calcium in the activation of invasion tube discharge

976 **E. Weidner.** The microsporidian spore invasion tube. III. Tube extrusion and assembly

Rapid Communication

981 **V. T. Oi, A. N. Glazer, and L. Stryer.** Fluorescent phycobiliprotein conjugates for analyses of cells and molecules

987 **K. S. Zaner and T. P. Stossel.** Some perspectives on the viscosity of actin filaments
